Can I contribute to a class display on Lima in Peru?	Can I identify and locate continents and oceans?	Can I find out about five famous landmarks in London?	Can I create a 3D map of London landmarks using human and physical features?	Can I write directions to inform Paddington where to walk in London?	Can I compare London and Lima?
Peru is a country in South America. Lima is the capital of Peru. It can be found in the central coastal region of the country.	There are seven continents and 5 oceans. Continents: North American, South America, Africa, Europe, Asia, Australia, Antarctica Ocean: Arctic, Southern, Indian, Pacific, Atlantic	London is the capital of England. It is home to lots of landmarks that tourist love to go and see. These include the London Eye, Big Ben and the Thames River,	Map can be used to help direct us to the correct place. We can identify where we are by looking for physical and human features. A key can also help us to identify these features.	Directions are a set of instructions used to help us get from one place to another. We can use different directional language to guide someone for example left, right, towards etc.	There are many similarities and differences to these places for example the coldest month in Lima is August but in London this is the hottest month.
